

Hospital Performance Report 2019

APEKSHA HOSPITAL (NATIONAL CANCER INSTITUTE)

MAHARAGAMA

Medical Statistics Unit

Foreword

The National Cancer Institute of Sri Lanka (Apeksha Hospital) provides its services to over 60,000 inward patients which include more than 14,000 new registrations annually coming from various areas of the country. Out of these new registrations approximately 10,000 are identified as malignant. They are being managed with specialized treatment and follow up care.

The Hospital “**Performance Report – 2019**” contains data of services provided in 2019 to the patients registered at National Cancer Institute Sri Lanka. The aim of this publication is to provide accurate statistical data which is essential for health administrators, researchers, national policy makers and strategists in cancer related fields for the evaluation and further development of services provided at present.

Also I would take this opportunity to thank the heads of departments & staff for their cooperation in assisting me in this important task. I am also grateful to the staff of the Medical Records & Statistics Unit for their support and assistance to make this venture a success.

We welcome your comments & valuable suggestions for further improvement of this annual publication.

Introduction to National Cancer Institute, Sri Lanka. (APEKSHA HOSPITAL)

The National Cancer Institute (Apeksha Hospital) is a teaching hospital, managed under supervision of the Ministry of Health Sri Lanka. It is the premium hospital dedicated to diagnose, treat and follow up of cancer patients in Sri Lanka. Apeksha hospital is located at Maharagama, 16 km away from Colombo, the capital of Sri Lanka.

It was first established as a radiotherapy unit with inward facilities in 1958 and now it has developed into a tertiary care hospital with modern screening, diagnostic, & treatment facilities. The new “RAZAVI” building which added recently, consists of modern theater complex, bone marrow transplant unit, surgical & medical intensive care unit, normal wards and paying ward with all facilities, is a gold mark of the hospital history. Bone marrow transplant has commenced since December 2016 after establishing a new building with state of art facilities.

NCI, which spreads over 10 acres, provides care for approximately 140000 outdoor patients and 60000 indoor patients per year with 27 wards and intensive care units consist of 952 beds. 52 Consultants, 262 medical officers and more than 1700 health workers including nurses, pharmacists, radiographers, MLTs provide their service under the guidance of Director. Consultant Oncologists, Oncosurgeons, Oncogynaecologists, Haematooncologists and Physicians conduct outdoor clinics daily to follow up patients with malignancies by the help of all range of Haematological, Histopathological, Microbiological, Biochemical and Radiological investigations under the supervision of respective consultants.

All kinds of radiological treatment methods including Mega voltage photon & electron therapy, Brachytherapy and Iodine therapy are given free of charge. Physiotherapy, Speech therapy, Psychological Counselling, Pain management, Outdoor blood transfusion & Chemotherapy services are among the other services available in this hospital.

Establishment of bone marrow transplant unit and the PET-CT screening unit are the major achievements in past years as becoming the only government institute which provides these facilities free of charge to cancer patients.

Towards the e-Health.....

Hospital Information Management System (HIMS) is a comprehensive electronic system to support functions carried out in cancer care delivery. The system developed as in-house development at The National Cancer Institute in collaboration with the Department of Industrial Management, University of Kelaniya. The project management and the technical support is given by a group of doctors, who are trained medical Informaticians blending the essence of clinical experience with digital innovation. The project aims to provide fully integrated care to the public by generating the clinical information needed for a life-long, longitudinal electronic health record system at minimum cost.

The project started in 2013 with the financial support from Ahmed Tea Group (Donors of the Razavi Medical Complex) as a part of their initiative to support improvement in quality & safety of the patient care delivery.

Regular quality improvements & further enhancements are carried out in consultation with all stakeholders by the Health Information & Research Unit & it is the main focal point for the development & implementation of the HIMS at the National Cancer Institute.

The implementation of the HIMS started in 2015 with the registration, admission, transfer & discharge modules. The HIMS fully integrated with the electronic Indoor Morbidity & Mortality Report (e-IMMR) of the Ministry of Health. e-IMMR is the national database for the collection of disease burden details.

The Radiology Information System, Picture Archiving & Communication System (PACS), Microbiology laboratory & Dental modules are functioning fully at present & the Haematology & Histopathology labs are to be operational soon.

The pharmacy system is ready for implementation & awaiting necessary approval from the hospital administration. The plans for future implementations include clinic module & electronic medical record (EMR) which encompasses electronic prescribing & issue of the digital patient discharge summary. The data from the EMR will be utilised to create the hospital-based cancer registry of the Ministry of Health, Sri Lanka.

Apart from the National Cancer Institute, eleven other tertiary care institutions of the Ministry of Health have implemented the HIMS to manage their patient information digitally.
